SX6036 InfiniBand Switch

36-port Non-blocking Managed 56Gb/s InfiniBand/VPI SDN Switch System

**SUSTAINED NETWORK PERFORMANCE**
Built with Mellanox’s sixth latest SwitchX® InfiniBand switch device, the SX6036 provides up to thirty-six 56Gb/s full bi-directional bandwidth per port. These stand-alone switches are an ideal choice for top-of-rack leaf connectivity or for building small to extremely large sized clusters.

FDR InfiniBand technology moves from 8b/10b encoding to a more efficient 64/66 encoding while increasing the per lane signaling rate to 14Gb/s. Mellanox end-to-end systems can also take advantage of the efficiency of 64/66 encoding using Mellanox FDR-10 supporting 20% more bandwidth over QDR using the same cables/connectors designed for 40GbE.

**WHY SOFTWARE DEFINED NETWORK (SDN)?**
Data center networks have become exceedingly complex. IT managers cannot optimize the networks for their applications leading to high CAPEX/OPEX, low ROI and IT headaches. Mellanox InfiniBand SDN Switches ensure separation between control and data planes. InfiniBand enables centralized management and view of network. Enabled are programmability of the network by external applications as well as a cost effective, simple and flat interconnect infrastructure.

The SX6036 enables efficient computing with features such as static routing, adaptive routing, and congestion control. These features ensure the maximum effective fabric bandwidth by eliminating congestion hot spots.

**VIRTUAL PROTOCOL INTERCONNECT® (VPI)**
Virtual Protocol Interconnect (VPI) flexibility enables any standard networking, clustering, storage, and management protocol to seamlessly operate over any converged network leveraging a consolidated software stack. VPI simplifies I/O system design and makes it easier for IT managers to deploy infrastructure that meets the challenges of a dynamic data center.

**MANAGEMENT**
SX6036 comes with an onboard subnet manager, enabling simple, out-of-the-box fabric bring-up for up to 648 nodes. SX6036 MLNX-OS® software delivers complete chassis management to manage the firmware, power supplies, fans, ports and other interfaces.

SX6036 can also be coupled with Mellanox’s Unified Fabric Manager™ (UFM™) software for managing scale-out InfiniBand computing environments. UFM enables data center operators to efficiently provision, monitor and operate the modern data center fabric. UFM boosts application performance and ensures that the fabric is up and running at all times.
Mellanox SX6036

- 19" rack mountable chassis, 1U with optional redundant power supplies and Fan units
- 36 QSFP non-blocking ports with aggregate data throughput up to 4.032Tb/s (FDR)
- Port-to-port latency 200ns

Switch Specifications
- Compliant with IBTA 1.21 and 1.3
- 9 virtual lanes: 8 data + 1 management
- 256 to 4Kbyte MTU
- Adaptive routing**
- Congestion control**
- Port mirroring**
- 4X48K entry linear forwarding data base

** Available in future releases

Specifications

Note: 56GbE operation requires an additional license.

Safety
- CB
- cTUVus
- CE
- CU

Power Supplies
- China CCC
- Korea KCC

EMC (Emissions)
- CE
- FCC
- VCCI
- ICES
- RCM

Operating Conditions
- Operating 0ºC to 45ºC
- Non Operating -40ºC to 70ºC
- Humidity: Operating 10% to 85%
- Altitude: Operating -60 to 3200m

Acoustic
- ISO 7779
- ETS 300 753

Others
- RoHS-6 compliant
- Rack-mountable, 1U
- 1-year warranty

Cooling
- Front-to-rear or rear-to-front cooling option
- Hot-swappable fan unit
- Auto-heat sensing for silent fan operation

Power Consumption
- FDR - Typical power consumption:
  - Passive cable - 126W
  - Active cable - 231W

Other
- RoHS-6 compliant
- Rack-mountable, 1U
- 1-year warranty
