

\$100 MILLION in lost trades per year!

What one extra millisecond of trade execution latency delay could cost

Low latency ConnectX-4 Lx Adapters from HPE ProLiant and Mellanox

NEW HPE 10/25GbE Adapters – Dual and Single Port Options Available

Lowest Latency

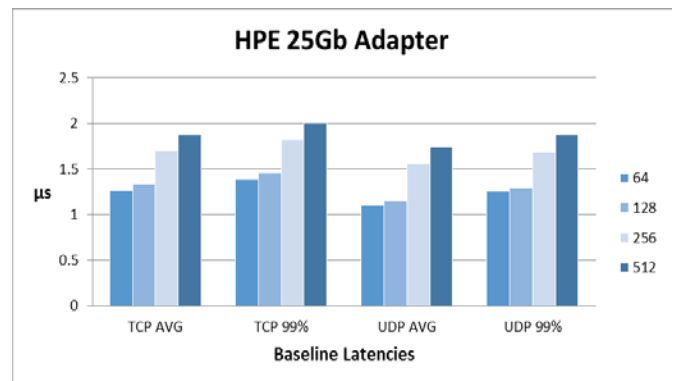

- Industry leading TCP and UDP latencies
- Tuned and optimized for high performance in the HFT operations

VMA Software

- Minimizes latency - Up to 300% faster
- Maximized throughput – Up to 200% higher packet rate
- No application code changes required

Time stamping and synchronization

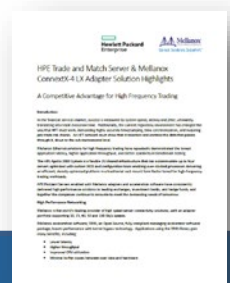

- Hardware timestamp to ALL incoming packets
- No impact on latency
- Fully integrated with FSMLabs Timekeeper

VMA Latency TCP 500 Connections (sockperf)

New Whitepaper Available:

A Competitive Advantage for High Frequency Trading

Introducing NEW 10/25GbE HPE ProLiant ConnectX-4 Lx Adapters

Flexible networking solutions delivering best-in-class and highest performance for demanding Enterprise applications

Scalable & Flexible

Reduced
Datacenter Costs

Future-Proof
with 1/10/25G

Open & Optimized
