

Mellanox Technologies Named to the Red Herring 100 for Second Straight Year

Red Herring Editors Recognize InfiniBand Silicon Leader's Strong Business Practices and Product Line

SANTA CLARA, CALIFORNIA and YOKNEAM, ISRAEL, May 13, 2002 - Mellanox Technologies, Ltd., the leading provider of InfiniBandSM silicon, announced today it has been selected for the Red Herring 100 list for a second straight year. The list recognizes the top 100 public and private companies whose services, business models and products define business innovation. It represents leaders of tomorrow in more than a dozen sectors, including software, biotechnology, wireless, communications services, media, hardware, nanotechnology, consumer electronics and energy. The list is selected by the editors of Red Herring, the leading magazine of business technology and innovation.

"We are proud to have been selected to the Red Herring 100 for the second straight year," said Eyal Waldman, CEO of Mellanox Technologies. "We are working with our customers and partners to realize the potential of the InfiniBand Architecture and are gratified to have achieved such significant progress. We appreciate that the Red Herring has chosen to recognize Mellanox and the importance of the growing InfiniBand market."

In its sixth year, the Red Herring 100 has become one of the most prestigious lists of its kind. Red Herring editors compile the list from subjective and metrical data favored by venture capitalists and investment bankers. These factors predict a company's ability to overturn existing markets or create entirely new ones.

The Red Herring 100 is featured in the June 2002 issue of Red Herring magazine and is also available on www.redherring.com. It includes a short profile of Mellanox.

About Mellanox

Mellanox is the leading supplier of InfiniBand semiconductors, providing switches, Host Channel Adapters, and Target Channel Adapters to the server, communications and data storage markets. In January 2001, Mellanox Technologies delivered the InfiniBridge MT21108, the first 1X/4X InfiniBand device to market, and is now shipping second-generation InfiniScale silicon. The company has raised more than \$89 million to date and has strong corporate and venture backing from Bessemer Venture Partners, Dell Computer, Intel Capital, Raza Venture Management, Sequoia Capital, Sun Microsystems, US Venture Partners, Vitesse and others. Mellanox has been selected to the Red Herring Magazine list of the 50 most important private companies in the world in 2001 and 2002. The company has also been included in Network Computing's Companies To Watch For 2002 and Computerworld Magazine's Top 100 Emerging Companies for 2002. Mellanox currently has more than 200 employees in multiple sites worldwide. The company's business operations, sales, marketing and customer support are headquartered in Santa Clara, CA; with the design, engineering, software, system validation, and quality and reliability operations based in Israel.
