SX6018 switch system provides the highest performing fabric solution in a 1U form factor by delivering up to 2Tb/s of non-blocking bandwidth with 200ns port-to-port latency.

**Scaling-Out Data Centers with Fourteen Data Rate (FDR) InfiniBand**
Faster servers based on PCIe 3.0, combined with high-performance storage and applications that use increasingly complex computations, are causing data bandwidth requirements to spiral upward. As servers are deployed with next generation processors, High-Performance Computing (HPC) environments and Enterprise Data Centers (EDC) will need every last bit of bandwidth delivered with Mellanox’s next generation of FDR InfiniBand high-speed smart switches.

**FDR**
FDR InfiniBand technology moves from 8b/10b encoding to a more efficient 64/66 encoding while increasing the per lane signaling rate to 14Gb/s. Mellanox end-to-end systems can also take advantage of the efficiency of 64/66 encoding using Mellanox FDR 10 supporting 20% more bandwidth over QDR using the same cables/connectors designed for 40 GbE.

**Sustained Network Performance**
Built with Mellanox’s sixth generation SwitchX®-2 InfiniBand switch device, the SX6018 provides up to eighteen 56Gb/s full bi-directional bandwidth per port. These stand-alone switches are an ideal choice for top-of-rack leaf connectivity or for building small to extremely large sized clusters.

**Why Software Defined Network (SDN)?**
Data center networks have become exceedingly complex. IT managers cannot optimize the networks for their applications leading to high CAPEX/OPEX, low ROI and IT headaches. Mellanox InfiniBand SDN Switches ensure separation between control and data planes. InfiniBand enables centralized management and view of network. Programmability of the network by external applications and enable cost effective, simple and flat interconnect infrastructure. The SX6018 enables efficient computing with features such as static routing, adaptive routing, and congestion control. These features ensure the maximum effective fabric bandwidth by eliminating congestion hot spots.

**Virtual Protocol Interconnect® (VPI)**
Virtual Protocol Interconnect (VPI) flexibility enables any standard networking, clustering, storage, and management protocol to seamlessly operate over any converged network leveraging a consolidated software stack. VPI simplifies I/O system design and makes it easier for IT managers to deploy infrastructure that meets the challenges of a dynamic data center.

**Management**
SX6018 comes with an onboard subnet manager, enabling simple, out-of-the-box fabric bring-up for up to 648 nodes. The MLNX-OS® software delivers complete chassis management, to manage the firmware, power supplies, fans, ports and other interfaces. MLNX-OS provides a license activated embedded diagnostic tool called Fabric Inspector to check node-to-node, node-to-switch connectivity and ensures fabric health.

SX6018 can also be coupled with Mellanox’s Unified Fabric Manager™ (UFM™) software for managing scale-out InfiniBand computing environments. UFM enables data center operators to efficiently provision, monitor and operate the modern data center fabric.
### SPECIFICATIONS

**MELLANOX SX6018**
- 19” rack mountable chassis, 1U with optional redundant power supplies and fan units
- 18 QSFP non blocking ports with aggregate data throughput up to 2.016 Tb/s (FDR)
- Port-to-port latency 200ns

**SWITCH SPECIFICATIONS**
- Compliant with IBTA 1.2.1 and 1.3
- 9 virtual lanes: 8 data + 1 management
- 256 to 4Kbyte MTU
- Adaptive routing**
- Congestion control**
- Port mirroring**
- 4X49K entry linear forwarding data base

**MANAGEMENT PORTS**
- Dual 10/100/1000 Ethernet ports
- RS232 port over DB9
- USB port

**DEVICE MANAGEMENT**
- CLI or SNMP

**FABRIC MANAGEMENT**
- On-board SM for fabrics up to 648 nodes
- Unified Fabric Manager™ (UFM™) agent

**CONNECTORS AND CABLING**
- QSFP connectors
- Passive copper or active fiber cables
- Fiber media adapters

**INDICATORS**
- Per port status LED Link, Activity
- System status LEDs: System, fans, power supplies
- Port Error LED
- Unit ID LED**

**PHYSICAL CHARACTERISTICS**
- Dimensions: 1.72”H x 16.84”W x 24.7”D
- Weight: 19.8 Lbs (9.0 Kgs)

**POWER SUPPLY**
- Dual redundant slots
- Hot plug operation
- Input range: 100 - 240VAC
- Frequency: 50-60Hz, single phase AC

**COOLING**
- Front-to-rear or rear-to-front cooling option
- Hot-swappable fan unit
- Auto-heat sensing for silent fan operation

**POWER CONSUMPTION**
- Passive cable - 105W
- Active cable - 152W

**SAFETY**
- CB
- cTUVus
- CE
- CU

**POWER SUPPLIES**
- China CCC
- Korea KCC

**EMC (EMISSIONS)**
- CE
- FCC
- VCCI
- ICES
- RCM

**OPERATING CONDITIONS**
- Operating 0ºC to 45ºC
- Non Operating -40ºC to 70ºC
- Humidity: Operating 10% to 85%
- Altitude: Operating -60 to 3200m

**ACOUSTIC**
- ISO 7779
- ETS 300 753

**OTHERS**
- RoHS-6 compliant
- Rack-mountable, 1U
- 1-year warranty

### Ordering Part Number

<table>
<thead>
