Complete Network Starter Kit for Nutanix
Networking as simple as the Nutanix Enterprise cloud

Introducing a New Nutanix Networking Kit from Mellanox

The complete network starter kit from Mellanox provides all the essentials to connect a single Nutanix rack of up to 48 nodes in minutes at up to 80% cost savings vs. the competition.

Mellanox offers an Ethernet network solution for Nutanix that is:

- Enterprise Class
- Integrated with Nutanix
- Fast to Deploy
- Easy to Manage
- Cost Effective

The kit has everything needed to connect a Nutanix cluster in a rack including two ToR switches, cabling between them, and network orchestration software providing a redundant solution with only using 1U of rack space. Tight integration with Nutanix AHV provides network configuration that is fast to deploy and easy to manage.

Included in the kit:

- Two Top of Rack Switches
- Rack Mount Kit
- NEO™ Network Orchestration Software
- 3-year Silver Support
- Passive Copper Cables

With the choice of two Ethernet switch models, the starter kit is customizable to fit the needs of your datacenter. Simply choose the switch, and the rest of the kit will come with everything needed to get Nutanix connected in minutes!

SN2010

Perfect for rack with 2-18 nodes
Server/Storage Ports:
18 x 10/25GbE
Dedicated Uplink Ports:
4 x 40/100GbE

SN2100

Perfect for high density racks
Server/Storage/Uplink Ports:
16 x 10/25/40/50/100GbE
Scales up to 64 x 10/25GbE with breakout cables

Differentiators:

Mellanox is the only vendor selling end-to-end Ethernet connectivity solutions: adapters, switches, cables, software, and support.

Mellanox Ethernet Switch:

- Unique Half Rack Width
- Up to 80% Cost Savings
- 50% Power Savings
- Flexible Port Configs
- Full Redundancy in 1U
- Network OS Choice
- Future-Proofed

Nutanix Integration:

- Fast Network Configuration
- Automated VLAN provisioning
- DCI with VXLAN/EVPN for multi clouds
- Blueprint for Nutanix Calm
